NDM Accuracy of Forecasting Report Gas Year 2014/2015

13th November 2015

Report Description

This report is an ongoing requirement of the Balancing Network Code (*Commission Regulation (EU) No 312/2014*). The requirement is outlined in Article 42, “*Information obligations of the forecasting party towards the transmission systems operator*”, Paragraph 3 ‘*a Report on the accuracy of the forecast of a network user’s Non Daily Metered off-takes shall be published by the forecasting party at least every two years*’.

The Forecasting Party in this instance is the ‘Metering and Data Services Group’ (MDS), Gas Networks Ireland who will publish the report on an annual basis for the Transporter, after the end of the Gas Year. Upon approval by the CER, the report will be published on the Gas Networks Ireland website.

The data contained in this report is defined as follows:

| <u>Data Element</u> | <u>Description</u> |
|------------------------------|---|
| Date | Gas Day |
| Daily Delivered Energy (kWh) | Aggregate NDM delivered energy for Gas Day D, measured in kWh. This information is available in the Monthly transportation Reports published by Gas Networks Ireland. |
| Forecast Energy Demand (kWh) | Aggregate of the final NDM energy forecasts issued to shippers on Gas Day D. |
| Accuracy (%) | Calculated field, defining the % difference between the delivered and forecasted energy at all NDM offtakes for the relevant Gas Day. |

Under the CER approved Forecasting, Allocation, Reconciliation Procedures ([FAR Procedures](#)) the Transporter is required to issue NDM Nominations Advices to each shipper registered as holding NDM Exit Capacity in accordance with Part D, Section 1.6 of the [Gas Networks Ireland Code of Operations](#) on a daily basis. The Forecasted Energy Demand in the report is an aggregation of the individual forecasts issued by Gas Networks Ireland to each NDM shipper on a given Gas Day.

There will always be variances between the level of NDM forecasts issued to shippers each day and the actual level of NDM demand on the day. The accuracy of the forecast on any given day will be subject to variations caused by a number of reasons including, but not limited to:

- Changes in weather forecasts;
- Changes in actual weather (and degree to which end user demand responds); and
- Changes in End User Demand (e.g. change of occupancy).

October 2014

| Date | Daily Delivered Energy kWh | Forecast Energy Demand kWh | Accuracy % |
|-------------|----------------------------|----------------------------|------------|
| 01-Oct-2014 | 13,700,874 | 13,731,609 | 0% |
| 02-Oct-2014 | 14,775,549 | 15,625,610 | -5% |
| 03-Oct-2014 | 16,930,839 | 17,069,513 | -1% |
